

Interview Questions

- Question 1, Prog
- Question 2, Prog
- Question 3, Prog
- Question 4, Theory
- Question 5, Theory

Question 1, Prog

There two integer arrays, both are having a number in common find out the number which is common.
Do not use for loop

Question 2, Prog

Find out whether a number is prime or not write down the logic for it and also so find a alternative solution where for loop is not involved

Question 3, Prog

Find out all possible permutations and combinations of a string
Possible solution 1 with for loop
Solution 2 using recursion

Question 4, Theory

What is JIT compiler

Question 5, Theory

Is bytecode platform independent
